

PDSC - Tuesday Hike Report  
San Gregorio Reservoir Long - San Pedro Parks  
Tuesday, 06/25/19

**Rating** C  
**Hike Miles** 7.1  
**Elevation Gain** 783  
**Hike Time** 5:00

**Report** 13 hikers including two newbies went on this hike on a clear, not too warm day. There was lots of water (in the lake, in the streams, in lower areas). We saw fields of golden pea and iris. Many of the unusual Pygmy Bitterroot were blooming in the meadows near the lunch spot. There were even patches of snow! We had to navigate several marshy areas and stream crossings. A couple of us fell in and got wet (including the hike leader), fortunately with no injuries. Thanks to Don for driving and sweeping.

**Hike Leader** Marilyn Warrant
